TOYO INK THE INK OF CHOICE FOR GRAPH EXPO PRESS DEMONSTRATIONS

ADDISON, Ill. — This month, when tens of thousands of graphic arts professionals swarm the exhibition areas in Chicago's McCormick Place, many will be seeing live press demonstrations performed using ink products provided by TOYO INK America. Major press manufacturers overwhelmingly chose TOYO INK products to show off the print quality of their machines at Graph Expo & Converting Expo 2006.

Heidelberg USA (Kennesaw, Ga.) heads a long list of press makers that will feature TOYO INK's formulations on their show presses. Heidelberg selected TOYO for commercial and industrial printing applications based on many years of experience with the company's products at the Heidelberg USA demonstration center.

TOYO INK also is a longtime supplier of inks to Komori America Corp. (Rolling Meadows, Ill.). Komori has printed with TOYO inks on its demonstration presses for more than 15 years. The company said it continues to rely on TOYO products because they “offer overall great printability.”

Other press builders that will feature inks from TOYO INK at Graph Expo include Akiyama (Cerritos, N.J.), Halm Industries Co., Inc. (Glen Head, N.Y.) and Adast a.s. (Adamov, Czech Republic).

Screen (USA), the Rolling Meadows, Ill.-based supplier of digital prepress systems and components, will utilize TOYO INK’s popular HyPlus EC process series ink on the four-color Truepress 344 four-color DI press.

“We wanted the best reproduction possible,” said Mark Crawford, Screen’s product manager for output solutions. “The print quality with HyPlus EC is excellent using different fountain solutions. The ink lays down nicely on the sheet and traps well without any problems. It dries quickly.”

TOYO INK America (Booth #2406) will exhibit a comprehensive lineup of ink products at Graph Expo & Converting Expo 2006.
